SUMMARY

I am a Computer Science graduate and full-stack developer with hands-on experience building, testing, and deploying web and mobile applications in Agile teams. Comfortable across the SDLC, from requirements through integration testing and cloud deployment, with a focus on well-tested code and team collaboration.

TECHNICAL SKILLS

Programming:	Java, Python, SQL, JavaScript, C, Dart
Frameworks:	MERN (MongoDB, Express, React, Node.js), PERN (PostgreSQL, Express, React, Node.js), Flutter
Infrastructure:	Google Cloud Platform (GCP), Amazon Web Services (AWS), Docker, Linux, Inngest,
Testing & QA:	Playwright (E2E), Mocha, Chai (integration testing), Postman
Collaboration:	Agile/Scrum, CI/CD, GitLab, GitHub, Redmine, cross-functional teamwork

WORK EXPERIENCE

Web Developer Intern | i-BRIDGE Systems Philippines Inc. | July - August 2025

- Built and integrated front-end interfaces with backend database fields for new application features using the MERN stack, working within an Agile sprint cycle tracked in GitLab and Redmine.
- Wrote and executed integration tests with Mocha and Chai to validate feature behavior before release
- Deployed application features to Google Cloud Platform (GCP), gaining hands-on exposure to cloud-based release workflows
- Collaborated with developers and stakeholders throughout the sprint cycle to coordinate feature delivery

PROJECTS

Retrieval-Augmented Generation (RAG) using Google Gemini

- Developed a local Python RAG application for querying PDFs using Google Gemini API
- Utilized Llama Index for chunking PDFs and Qdrant for storing it in a vector database
- Integrated an Inngest development server for logging and monitoring the application

Learning Platform for LaTeX Writers

- Led requirements-gathering with 20 students to define core features for a LaTeX-focused learning platform
- Self-hosted the MERN application with a local database, handling end-to-end setup and deployment
- Achieved a System Usability Scale score of 83.25, indicating strong usability against industry benchmarks

Mobile Health Monitoring System

- Developed a QR-code scanning feature with Flutter enabling building staff to record entry

EDUCATIONAL BACKGROUND

Bachelor of Science in Computer Science | University of the Philippines - Los Baños | 2021 - 2026

TRAINING & CERTIFICATES

End-to-End Testing with Playwright | Microsoft
AWS Cloud Practitioner Essentials | Amazon Web Services
Introduction to Cybersecurity | Cisco

ORGANIZATIONAL EXPERIENCE

Senior Volunteer | UPLB Ugnayan ng Pahinungód | March 2023 - Present

- Co-facilitated training sessions for 140+ volunteers and 50+ undergraduate students

Technical Director | UPLB Street Jazz Dance Company | October 2023 - May 2024

- Led a technical committee for stage setup, audio, lighting, coordinating with organizations and vendors

Executive Member | Kapatirang Pitong Lawa sa UP Los Baños | January - April 2023

- Managed socio-cultural, logistical and technical support for on-ground community activities
